

Every Family is an Epic. Don't Let the Film Fade.

Living Chronicles

Caroline Xia, Carols Cui

The Background

Analog Erosion

Over 500 billion analog photos worldwide are still trapped in physical albums, unprotected from the elements, which degrade by 3-5% per year due to acidity, humidity, and UV exposure.

Silent Tsunami

The “Silver Tsunami” is here. By 2030, 1 in 6 people globally will be aged 60 or over. In migrant societies (Singapore, UK, USA), over 70% of Gen Z cannot fluently use their native dialects, and lost their family memory.

Silence Memory

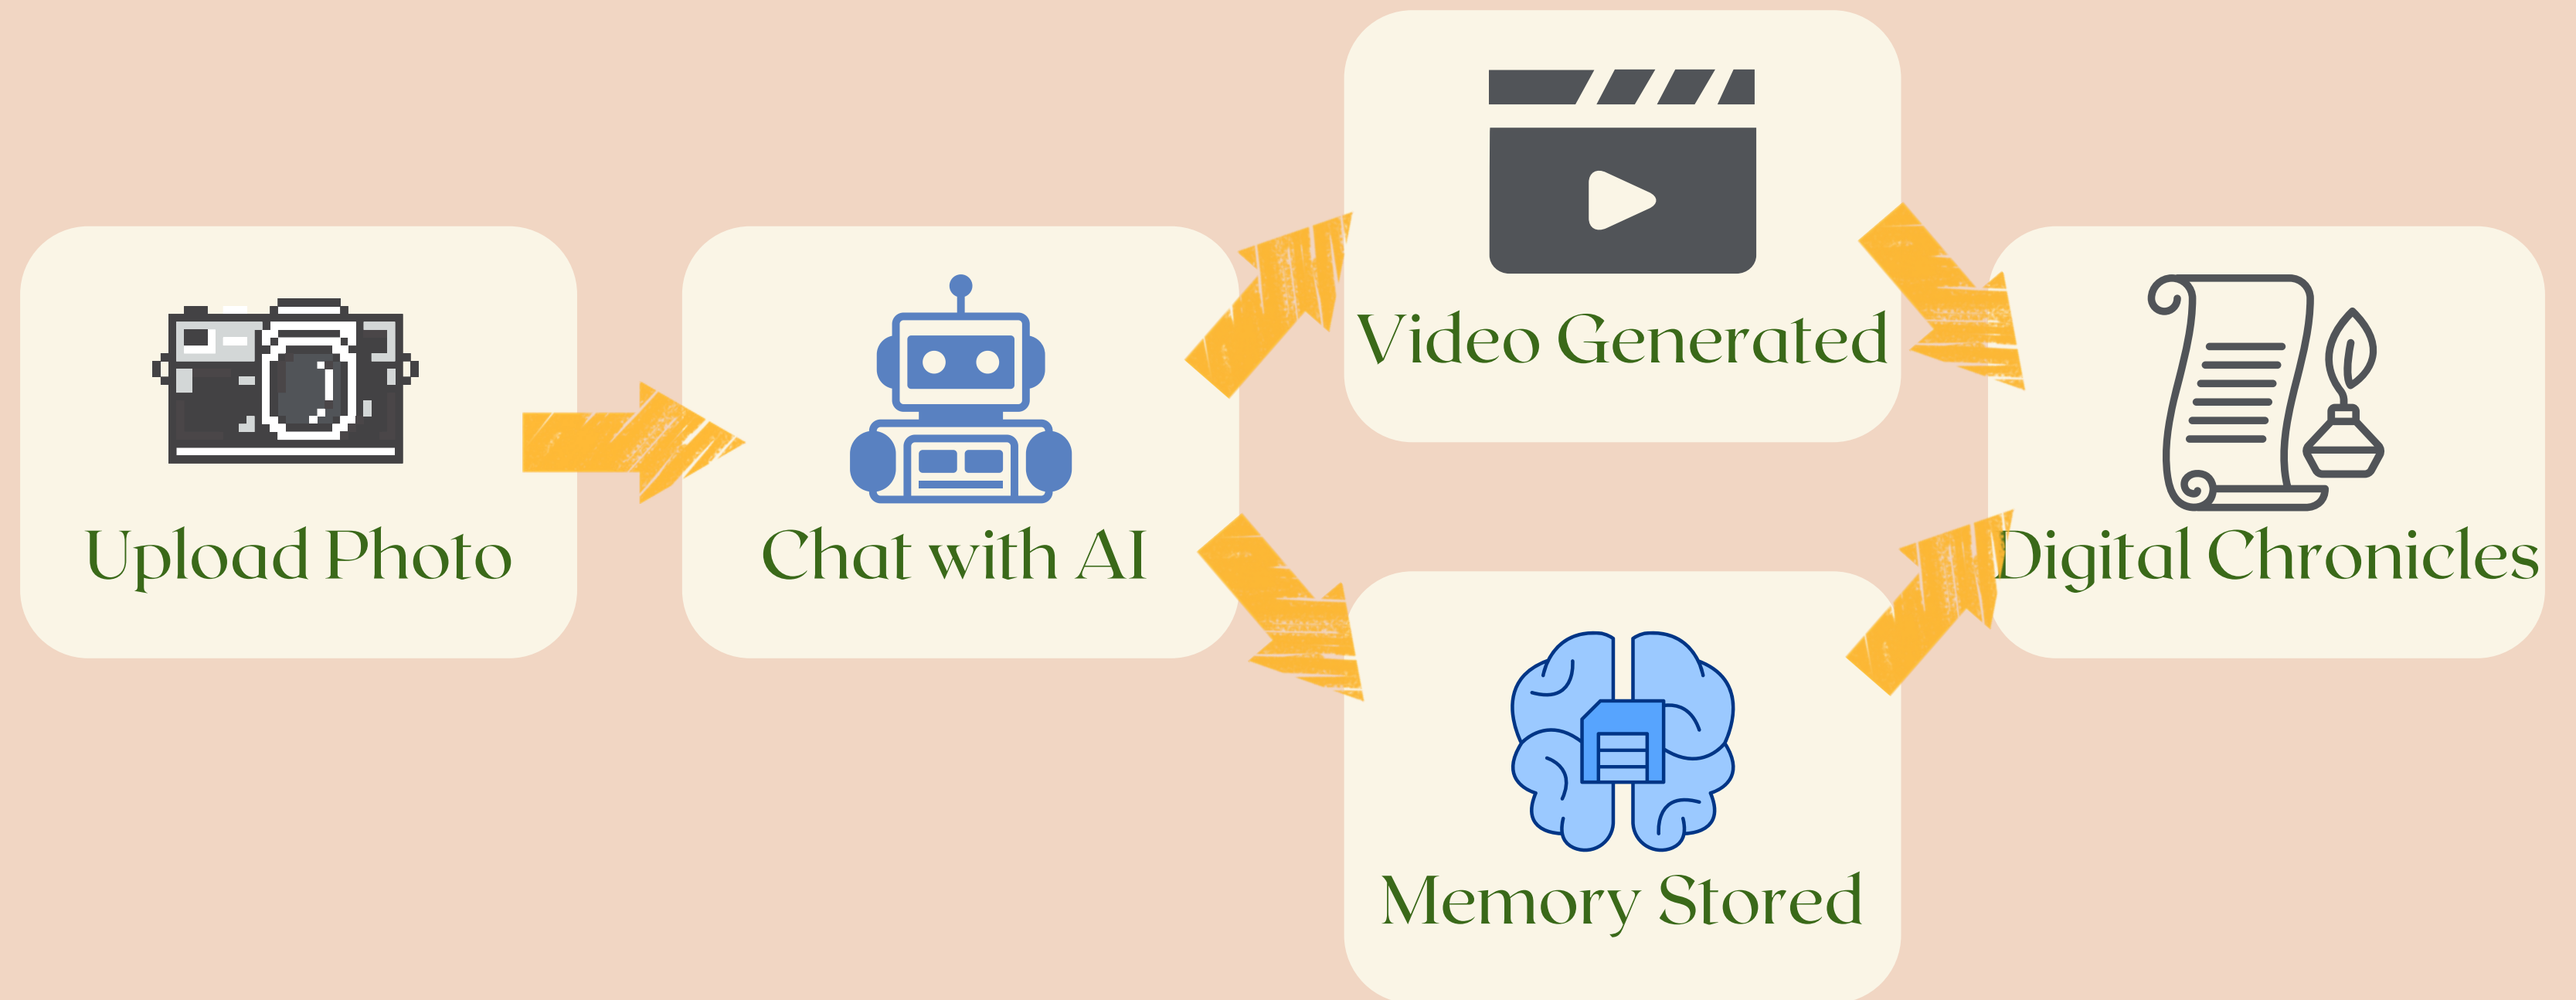

Static images are silent; they cannot capture the specific warmth of a grandmother’s laughter, the cadence of a father’s dialect, or the wisdom in a mentor’s storytelling.

Living Chronicles

Living Chronicles is a next-generation family memory platform powered by Multimodal LLMs and Graph Databases. It aggregates fragmented oral histories, archives, and migration records into an interactive, conversational heritage. The platform enables real-time, cross-generational dialogue, turning "silent data" into Digital Family Memory Chronicle and emotionally intelligent Digital Personas.

The Solution

A Photo + Details (When, Where, Who, What) = Digital Chronicles

Dynamic Image

Breathing Life into Stillness

- **The Magic of Motion:** Utilizing Seedance 2.0, we transform static, faded photographs into high-definition cinematic moments.
- **Subtle Realism:** AI simulates natural micro-expressions—a gentle blink, a nostalgic smile—reconstructing the emotional atmosphere of the original day.

Family Memory

The Eternal Library

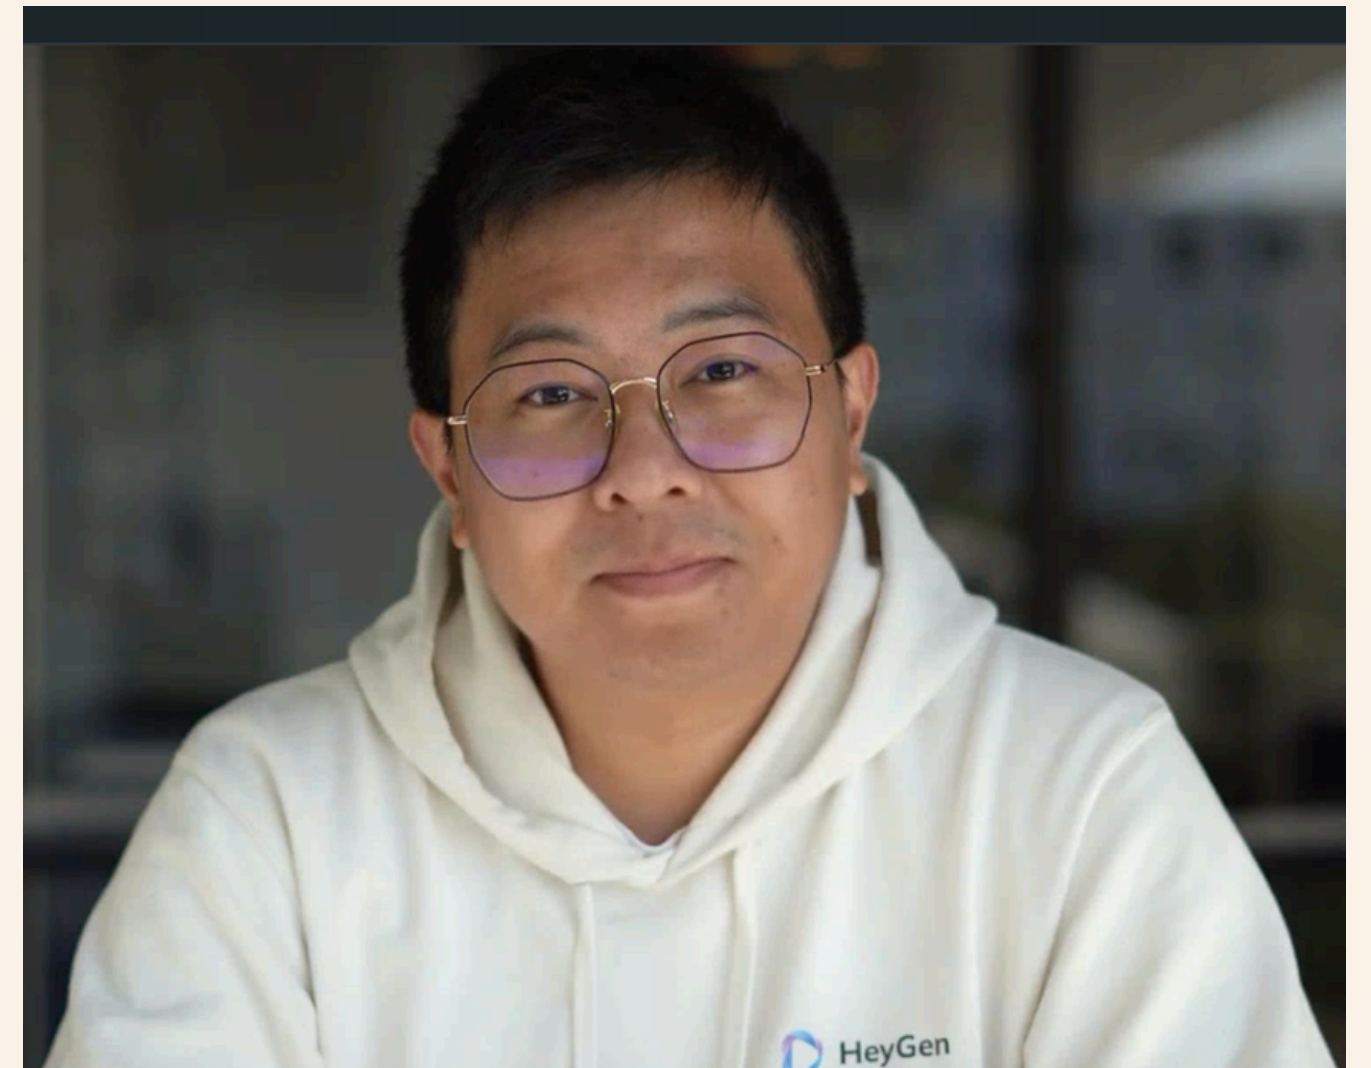

- **Narrative Intelligence:** Powered by Mistral AI, we extract entities and emotions from fragmented oral histories and letters to build a coherent family saga.
- **Contextual GraphRAG:** Your family history is stored in a private Knowledge Graph, ensuring every generated story is grounded in actual family truth, not AI hallucinations.

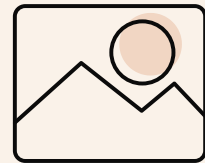

Digital Human

Conversations Across Time

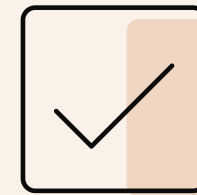

- **The Digital Twin:** We reconstruct the Digital Persona of your ancestors, blending their unique dialect, wisdom, and personality.
- **Interactive Legacy:** Ask, listen, and learn. The Digital Human provides a real-time, emotive interface to consult the wisdom of those who came before us.

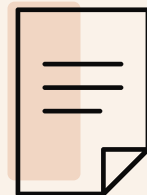

Tech Architecture

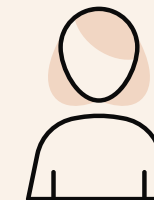

Frontend: React.js

Backend: FastAPI + Python

Memory: Graph RAG

**AI Models: Mistral AI,
Seedance2.0**

Business Potential

Antídote to Loneliness

Death often leaves a “narrative vacuum”—a silence that leads to profound isolation for those left behind. Our AI creates a living bridge to deceased loved ones through Digital Humans.

Silver Economy

We offer “Reminiscence-as-a-Service.” For the elderly, the ability to see their own late parents “breathe” again through Dynamic Images is a profound psychological breakthrough.

Cultural Sovereignty

We are the “Missing Link” for global heritage. By integrating with existing genealogy databases (like Ancestry or MyHeritage), we provide the multi-modal, dialect-specific data that Nowadays platforms lack.

Every Family is an Epic. Don't Let the Film Fade.

Thank You
