

Petsona

—Pet Personality Profile

Emily, Ethan, Caroline

2026/02/21

The Background

Pet Humanization

Owners are no longer satisfied with just physical care; they seek a deeper psychological connection. A personality test provides a framework to "understand" a pet's moods and preferences.

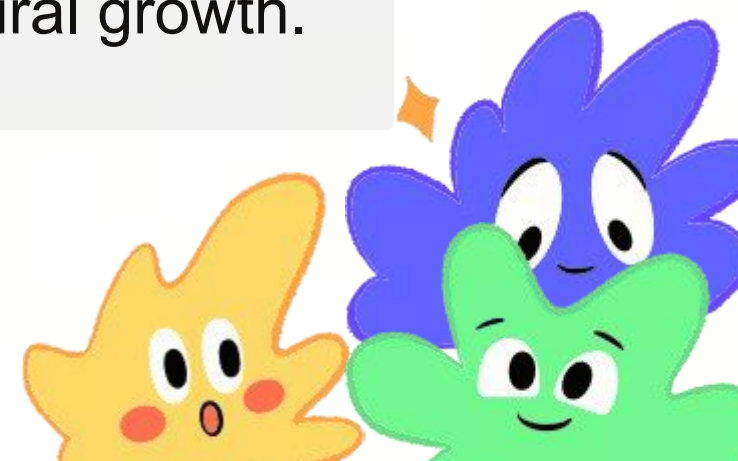

Social Safety

A personality test (e.g., "Introverted/Anxious" vs. "Alpha/Extroverted") helps owners predict how their pets will react in elevators or crowded dog runs, reducing the risk of fights or stress.

Social Currency

Singaporeans love sharing life milestones on Instagram and TikTok, a visually appealing "Pet MBTI" infographic is highly shareable, driving organic viral growth.

The Solution

Photo + 4 Fun Questions = AI Personality Card

offer

(furious) Human! Control your friend!

Shadow Cat

Hehe, they actually like me~

Keep Matching ❤️

Tech Architecture

Plan & Coding with TRAE

Frontend

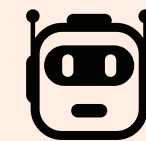

React + Tailwind CSS

Mobile-first responsive

Backend

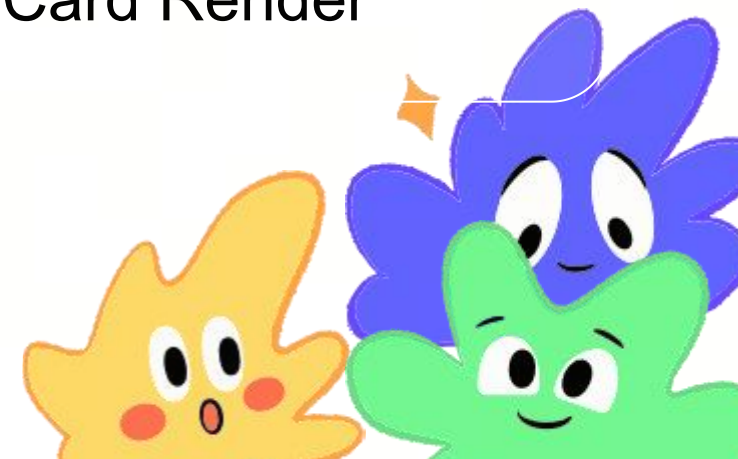

FastAPI + Python
Async request handling
Mock data fallback

AI Model

MiniMax M2.5
Multimodal (image + text)
3-5 sec response

Data Flow: Photo Base64 + Answers → FastAPI → MiniMax API → JSON Persona → Frontend Card Render

Business Potential

Monetization

- 💎 Premium profiles / advanced types
- 🤝 Brand partnerships (pet food/products)
- 🏪^{24H} Pet shop / vet clinic SaaS tool
- 🎮 Custom merch (stickers/tags/cards)

Target Users

- 🐾 Pet owners (cats/dogs primarily)
- 🌟 MBTI / personality test enthusiasts
- 📱 18-35 social media active users
- 👥 Pet communities / pet shops

Growth Engine

Card sharing + CP pairing = natural viral loop
Each pairing brings in 1 new user
